

Becrypt

Quality Management Policy

Purpose

The purpose of this document is to demonstrate Becrypt Management Board's commitment to quality management and to provide the over-arching policy statements to which all subordinate policies and control must adhere.

Policy

Becrypt is an agile London-based UK business with 20 years cyber security expertise, established through the development and delivery of End User Device platforms. We supply governments and security-conscious commercial organisations, large and small, with a range of security solutions and services - from funded research to commercially available products and flexible managed services.

The organization has established a set of processes within the framework of an ISO 9001: 2015 compliant Quality Management System (QMS). This is aimed at ensuring quality will be consistently met in all aspects of products and services provided. This QMS will also support improvement efforts with a continuous improvement mind-set.

The continuing Policy of Becrypt is to provide high quality products, and professional and efficient services to ensure the satisfaction of all of the requirements of our customers.

This will result in establishing a strong customer focus, enhancing the long-term sustainability and profitability of the Organisation. The Management Team will demonstrate leadership and commitment, and take responsibility for establishing, implementing and maintaining the Quality Management System.

We undertake to ensure sufficient resources are made available within the Organisation to achieve our quality objectives. We undertake to ensure through communication, engagement and training that Quality is the aim of all members of the Organisation. Through direction and support, each employee will have a proper understanding of the importance of the Quality Management System function, their responsibility to contribute to its effectiveness, and its direct relevance to the success of the Organisation. Equally, every employee is responsible for, and will be trained to perform the duties required by their specific role.

The Organisation has a Policy of promoting continual improvement and setting of Quality Objectives in line with the framework laid down within ISO 9001:2015 Standard. These objectives will address the risks and opportunities within the Organisation as determined by top management. Becrypt will set measurable objectives which will be reviewed regularly to ensure continual improvement. We hereby certify that the Quality Manual and associated Procedures documented within our QMS platform, accurately

describes the Quality System in use within the Organisation to meet the requirements of ISO 9001:2015. The Quality System will be monitored, measured, evaluated and enhanced regularly under the top management's ultimate responsibility, with regular reporting and communication of the status and effectiveness at all levels.
